

## A SEAMLESS APPROACH TO MANAGING ASSETS FOR BEST CONTROL AND PRODUCTIVITY

As projects come under more cost scrutiny, it is more important than ever to understand your assets' status. Shawcor has been a leader in oilfield tubular management for over 40 years and we are now re-inventing what it means to partner with a material supplier. Data on your assets can be accessed 24/7 so that your project and maintenance teams never question the status and availability of your assets.

This new generation of asset management software embodies the field expertise and decades of application experience of Yardview™ and Retrospec™ tubular inventory management and downhole pipe wearing trends software.

iLINE™ Asset Manager is a cloud-based solution which applies predictive analytics to optimize tubular maintenance and logistics operations in order to reach new levels of efficiency.

### ASSET MANAGEMENT

*Full command of inventory at your fingertips.*

- Immediate notifications on every transaction customized to your preference
- Easy and quick navigation, browse asset specifics such as condition, lengths, origin, etc.
- Complete traceability of equipment and materials in real time
- Keep track of service invoice packages, abolish redundant e-mails and long phone calls
- Work offline and on mobile devices, 24/7 access at any location

### SERVICE DATA ACQUISITION, INTEGRATION AND ANALYSIS

*Real-time pipe inspection data logging by Shawcor throughout the end-to-end service cycle.*

- Multi-level reports, see detailed status of each component, understand the big picture
- Intuitive dashboards, adaptable to convenience and specific needs of everyone in your team

- Instant updates, fresh records available as servicing completed
- A comprehensive catalog of pipe service information
- Unique features such as tube wear, allow a real-time control and traceability of asset life cycle
- Actionable analytics based on service and performance history, compatible and scalable to any ERP system

iLINE data-empowered solutions utilize solid digital technologies with built-in expertise to get your operation on the right track. Enabling fast, correct and informed decisions to help you eliminate waste, enhance workflows, and control costs to optimize your assets.
