

MOBILE BUCKING AND COUPLING SERVICES

Prioritize safety and drive profits through reduced rig downtime—ready to dispatch whenever you need us.

SAVE MONEY

Through the use of our bucking units, large stock of ready to go couplings and experienced staff, Shawcor saves our customers the expense of purchasing and maintaining their own equipment. Our complete solution includes inspection, reuse of maintained equipment and recycling. Customers keep one inventory of pipe and only exchange couplings as needed.

REDUCE RIG TIME

By pre-assembling downhole makeups, rig crews are able to begin the casing process quickly and easily, saving time and maximizing efficiency.

IMPROVE SAFETY

Established operating procedures combined with crew knowledge aid in eliminating potential safety hazards. In addition, float shoes and collars are not handled on the rig floor, preventing accidents from occurring by eliminating nonstandard work. Safety is our top priority.

CUSTOMIZED FOR YOUR OPERATION

Shawcor's lathes are designed to special clear, modify or bevel 99% of our couplings in-house. Our large inventory of Teflon seal rings meet the requirements of your operation. Computer torque monitoring is available upon request.

Shawcor Ltd. is a global energy services company specializing in products and services for the pipeline and pipe services segment of the oil and gas industry and related products for petrochemical and industrial markets. The Company operates through a network of fixed and mobile manufacturing and service facilities located around the world and is valued for its integrity, technology, and proven capability to execute the most complex projects in our industry.

OILFIELD ASSET MANAGEMENT | Shawcor.com/oilfield-asset-management
