

OVER THE WELL TUBE CHECK INSPECTION SERVICES

Maximize your investment and productivity while extending the lifecycle of your oilfield tubing.

RELIABILITY AND DURABILITY

Over the well (OTW) tube check inspection services utilize industry-leading electromagnetic induction technology designed to inspect oilfield tubing on the rig floor while being pulled out of the well. Our fast on-site calibration and reliable, quality inspection puts your well back in operation quickly.

PREVENTION OF TUBING DEFECTS

With OTW tube check inspection services, there are no moving parts, no wax interference and 100% circumferential coverage. Pitting, rod wear, transverse flaws and wall loss can be caught before they cause major problems, saving time and money.

MAXIMIZE EFFICIENCY

Shawcor's electromagnetic technology accurately locates loss of metallic area in used tubing. Combined with proactive assessments and custom reports we can improve efficiency by minimizing down-time due to defective tubing.

Shawcor Ltd. is a global energy services company specializing in products and services for the pipeline and pipe services segment of the oil and gas industry and related products for petrochemical and industrial markets. The Company operates through a network of fixed and mobile manufacturing and service facilities located around the world and is valued for its integrity, technology, and proven capability to execute the most complex projects in our industry.

SERVICE CENTERS:

British Columbia, Alberta,
Saskatchewan

CAPABILITIES:

2 3/8" to 4 1/2" O.D. API production tubing and small casing

ACCESSIBILITY:

Instant well profiles provide custom inspection reports

APPLICATIONS:

Ability to inspect fluid, wax, sand filled pipe and lined pipe

GAMMA RADIATION FREE INSPECTION:

Reduce environmental damage and risk to employees
