

## CH4-FINLEY TURNED TO SHAWCOR'S 5" FLEXPipe HT WHEN THEY NEEDED A RELIABLE, EASY TO INSTALL AND EASILY ACCESSIBLE PRODUCT.

**LOCATION:**  
Utah, USA

**APPLICATION:**  
Water

**INSTALLATION METHOD:**  
Trench

**PRODUCTS:**  
26,400 feet (8,050 meters) of Twin 5" FlexPipe™ HT (5" FP601 HT)

**OPERATING CONDITIONS:**  
700 psi, 140°F (4,830 kPa, 60°C), H2S Present

**SERVICES:**  
Line pipe installation, field support, engineering support, training

In February of 2020, CH4-Finley Operating made the decision to install two side-by-side lines of Shawcor's newest larger-diameter product: 5" FlexPipe HT.

Mike Miller, Foreman at CH4 Energy expressed his thoughts on the overall experience:

***"The product arrived on time and was easy to install. Sales, service and support were all very professional. Very pleased overall."***

Twin 5" FlexPipe lines were chosen over a single 8" line due to the comparable flow rates and installation efficiencies gained by using spoolable pipe. While the purchasing decision was made based on the pressure and sizing of 5" FlexPipe HT, CH4-Finley also realized the many benefits of using spoolable, composite pipe.

## 5" FLEXPIPE HT

### ***Shawcor and CH4-Finley installed 26,400 feet (8,050 meters) of twin 5" FlexPipe HT in just 11 days.***

Out of those 11 days, it took three days to deploy the pipe, seven days to install the pipe and fittings, and one day to hydrotest. Mike Miller, Foreman at CH4 Energy, had never used composite line pipe products before, and found that Shawcor's FlexPipe HT was easy to spool out and fittings were also easy to install.

Another benefit of using Shawcor's spoolable composite line pipe products is that Shawcor can provide custom fitting solutions to match any system configuration. For the CH4-Finley system, Shawcor designed and supplied over 50 custom flow joints to meet the needs of the project. Shawcor's custom fittings are made with an electroless nickel coating; combined with composite pipe to provide an all-around corrosion-resistant solution.

Overall, the benefits CH4-Finley gained by choosing Shawcor composite pipe was ease of installation, great customer service with on-time delivery and good communication from start to finish.
