

DERAY[®]-BIOK

Translucent polyolefin insulation cap

Non-shrinkable insulation cap with integral butyl liner for insulation of end splices in wire harnesses and electronic components.

Features And Benefits

- Halogen-free
- Easy and low-cost installation without processing appliances
- Good adhesion to the object due to the interior lining with butyl rubber strips
- Good resistance to aggressive media and fuel
- Good adhesion to various types of insulation material such as PVC, VPE, PP-EPDM
- Translucent material allows optimum positioning
- Continuous operating temperature: -35°C to 85°C

Standards

- Approved to all major Automotive OEM specifications

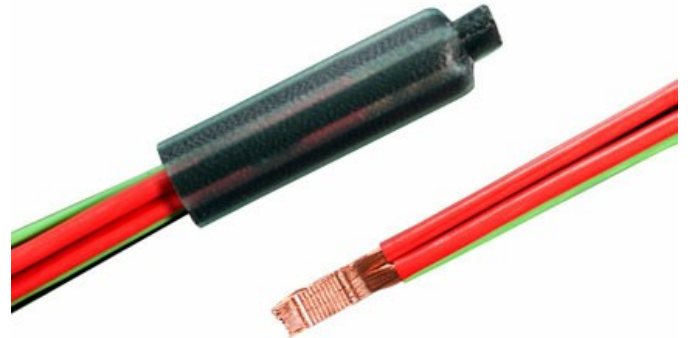

Typical Applications

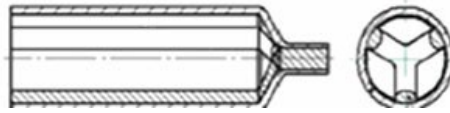

- Electrical insulation of end splices
- Mechanical protection of end splices

Ordering

- Select options:
 - Color: Black-Clear (BK), Grey-Clear (GY), Yellow-Clear (YL), Green-Clear (GR), Blue-Clear (BL), White-Clear (WT), Clear (CL)
- Please specify the product name, order number and options you require
- Order example: DERAY[®]-BIOK 9205542110 or 5.5x42mm, yellow-clear

Please contact your Customer Service Representative for information on custom colors, sizes, lengths and material data sheet.
