

 **SHAWCOR** **LINE**

**DATA-EMPOWERED SOLUTIONS  
TO ACCELERATE YOUR BUSINESS**

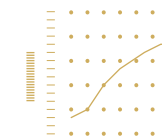

SEE EVERY INCH  
OF EVERY PIPE,  
EVERY MINUTE  
OF ITS LIFE.

ACHIEVE NEW LEVELS OF OPERATIONAL EXCELLENCE WITH  
COMPLETE VISIBILITY OF PIPELINE ASSETS AND IMPROVED  
WORK PROCESSES.

Shawcor is focused on a digital transformation of our products and services. iLINE, our new platform of data-empowered solutions, is designed to improve efficiency and safety, reduce costs and delays, eliminate risks, and ultimately optimize the life of your pipeline.

iLINE solutions add a layer of digital technology to Shawcor pipeline offerings to integrate tracking, traceability, asset management and other informative capabilities to help drive better decisions and streamline your operation. These technologies include RFID tagging, GPS, event-time stamping and more, giving you 24/7 remote access to accurate, verifiable information on your full range of pipeline assets. You're able to reduce the need for personnel in high-risk areas and eliminate expensive and error-prone manual processes. With iLINE, you know exactly what you have at all times, no matter where the assets are, no matter where you are.

## **trace**

### WEB-BASED PIPE TRACEABILITY

iTrace is a secure online portal that consolidates all traceability data for pipe materials and manufacturing process parameters, from design and engineering to building and maintenance. Harnessing the latest IoT technologies, you're able to see location, movements, custody, temperature and any other sensed condition of an asset. You're able to gain immediate access to important data whenever you need it, from any web or mobile device. You also gain the confidence that your data is detailed, accurate and current, so you can maintain the highest-quality records and ensure regulatory compliance.

## **track**

### WEB-BASED ASSET MANAGEMENT

iTrack is a state-of-the-art online asset management and data retrieval portal that gives you a 360° view of your pipe inventories. It's built upon a secure database that gives you real-time visibility into all of your assets – what they are, where they are, and what condition they're in. Through a simple, intuitive interface, you have anytime web or mobile access to monitor and manage every aspect of each pipe's progress, from order to invoice. View service history. Run analytics. Generate tailored reports. iTrack gives you the power to optimize workflows, improve asset utilization and simplify operations.

---

## ILINE TECHNOLOGIES WE'RE DEVELOPING FOR RELEASE IN THE NEAR FUTURE.

### Remote Inspection Auditing

Ensure integrity in the field, speed construction processes, improve safety and save costs. Inspection images are transmitted to the cloud, reducing field headcount while boosting efficiency.

### Web Portal For Field Operation Reporting

Gain total visibility into pipe coating processes and live access to all documentation throughout the project lifecycle, including installation data, field reports, tickets and training status.

### Online Access to Tech Data and Pricing

Access the detailed technical information you need across your project at any time, from anywhere. You can conveniently see pricing and specific data that goes beyond the limitations of a datasheet.

### Real-Time Data for Process Improvement

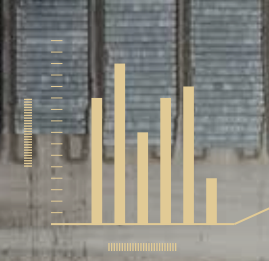

Reduce operator errors and streamline processes across your facility by gaining ongoing visibility to data from cycles, events and sensors. You're able to ensure proper product selection and improve safety.

### Visibility into Operational Parameters

Consolidate data from manufactured and constructed items, inspections, tests, metallurgy and operating conditions in a single cloud hosted portal. Integrate knowledge to reduce costs and extend asset life.

UNLEASH THE POWER OF DATA TO IMPROVE YOUR OPERATION FROM END TO END. CONTACT THE DIGITAL SPECIALISTS AT SHAWCOR FOR MORE INFORMATION ABOUT THE ILINE SUITE OF SOLUTIONS.
